Bachelor of Engineering in Computer Engineering	CGPA: 8.92/10

TECHNICAL STRENGTHS

Computer Languages: Java, JavaScript, C Programming
Software & Frameworks: HTML, CSS, Bootstrap, SQL

PROJECTS

Placement Eligibity Checker   July 2023 -October 2023

This Java project provides a system for checking eligibility of students for placement interviews based on their semester and CGPA. It includes two modules: an admin module for entering recruiting companies and their required CGPA, and a student module for students to check their eligibility and view a list of eligible companies.

Simon Says Game   January 2024

This is a simple implementation of the classic Simon Says memory game using HTML, CSS, and JavaScript. In this game, the computer generates a sequence of button flashes, and the player must repeat the sequence correctly to advance to the next level. The game keeps track of the player's score and displays the highest score achieved.

Skills

Problem-Solving: Creative problem solver with a proactive approach to addressing challenges. Experienced in identifying issues, developing innovative solutions, and implementing effective strategies to achieve desired outcomes.

Time Management: Excellent time-management skills, adept at prioritizing tasks and meeting deadlines efficiently. Proven ability to balance academic commitments, extracurricular activities, and personal responsibilities effectively.
